Ramnarayan Reddy Kagithapuram

PRIVACY ENGINEER | SOFTWARE ENGINEER

Atlanta, GA | 216-716-0176 | ramnarayanreddyk@gmail.com | github.com/ramreddys49 | linkedin.com/in/rana92

PROFESSIONAL SUMMARY

Privacy and software engineer with 7+ years of experience spanning enterprise application development, consent management, privacy-by-design, and technical troubleshooting. Experience implementing and validating privacy controls across web, iOS, Android, and connected TV platforms, including OneTrust CMP, IAB TCF, GPP, and U.S. state privacy frameworks. Skilled in API integrations, JavaScript/Node.js, automated testing, consent signal analysis, and cross-functional delivery with engineering, product, QA, and privacy stakeholders.

TECHNICAL SKILLS

Privacy & Standards: OneTrust CMP, consent management, GDPR, CCPA/CPRA, GPP, MSPA, IAB TCF 2.2/2.3, U.S. privacy signals, privacy-by-design, vendor consent mapping

Engineering: JavaScript, TypeScript, Node.js, React, Angular, Python, Java, REST APIs, SQL, MongoDB

Validation & Platforms: Web, iOS, Android, CTV/Roku, Playwright, BrowserStack, Charles Proxy, privacy/network debugging, consent-string validation

Delivery & Cloud: Git, GitHub Actions, Jenkins, Docker, Azure, CI/CD, Agile collaboration

PROFESSIONAL EXPERIENCE

Software Engineer — Privacy Technology | CNN / Warner Bros. Discovery | Aug 2019 – Present (Contractor to Nov 2021; employee since Dec 2021)

- Implemented and supported consent management experiences across CNN web, mobile, and connected TV applications, supporting region-specific privacy requirements and user preference controls.
- Investigated OneTrust CMP and internal consent-layer behavior, including GDPR banners, U.S. privacy choices, consent persistence, and first-launch or account-switching edge cases.
- Validated consent signals and integrations involving IAB TCF strings, GPP, U.S. privacy strings, downstream advertising partners, and account-level consent services.
- Analyzed client-to-service API flows, application lifecycle timing, and browser/WebView storage to isolate consent race conditions and inconsistent platform behavior.
- Contributed to automated privacy scanning and validation using browser testing to identify cookies, pixels, and third-party network requests before and after user consent.
- Collaborated with web, iOS, Android, CTV, QA, product, and privacy stakeholders to triage regressions, define test scenarios, and support reliable releases.

Python / UI Developer | Okyte Inc | Denver, CO | *May 2019 – Jul 2019*

- Developed data automation tools supporting user-data protection, backup, and recovery workflows.
- Built reusable UI components and secure data handling workflows with JavaScript-based technologies; supported Jenkins and Docker deployment pipelines.

Software Developer | Centene Corporation | St. Louis, MO | *Mar 2018 – Apr 2019*

- Developed healthcare applications with access controls, data encryption, and secure API integration for sensitive information.
- Implemented authentication functionality and contributed to Agile delivery and CI/CD automation.

EDUCATION

Master of Science, Industrial Technology | University of Central Missouri, Warrensburg, MO

Bachelor of Technology, Computer Science & Engineering | JNTU, Hyderabad, India

PERSONAL PROJECTS

Privacy X-Ray - Interactive Privacy Engineering Lab

GitHub: https://github.com/ramreddys49/privacy-xray

Live Demo: https://privacy-xray.vercel.app

- Built an interactive web application demonstrating consent management, event processing, behavioral profiling, and personalized content.
- Simulated GDPR and US privacy models with real-time consent enforcement and privacy engineering workflows.
- Developed using Next.js, React, TypeScript, and Tailwind CSS with a strong focus on privacy-by-design principles.

Feed X-Ray - Interactive Recommendation System Simulator

GitHub: https://github.com/ramreddys49/feed-xray

Live Demo: https://feed-xray.vercel.app

- Built an interactive social-feed simulator showing how user interactions influence content ranking, inferred interests, and personalized recommendations.
- Implemented deterministic ranking, explainable scoring, and separate organic and sponsored content selection with an interactive Engineer Mode and guided walkthrough.
- Developed with Next.js, React, TypeScript, Tailwind CSS, and Vitest using synthetic data.
